

Installing Webcam

Instructions for Using the Logitech Webcam C210

1. Open the webcam that you received.
2. Plug the webcam into your computer's USB drive.
3. Place the webcam on top of your computer monitor.
4. Click on "my computer"
5. Double click the webcam icon.
6. If your computer recognizes the webcam a screen with what your camera is seeing will be displayed.
7. Exit out of that screen and move on to the "Instructions for using our Video Interview Conferencing System" "fonebro". If your computer does not recognize the camera go to step #8.
8. Place the installation CD from the webcam box into your CD Drive.
9. Select your language and click next.
10. Plug the webcam into the USB port if it is not already plugged in.
11. Select Quick Install and unclick the "Include Logitech Vid HD".
12. Click "Next" and wait for the Software to be installed.
13. When the Software is finished installing click "Finish" and proceed to the instructions for using video software.
